# Enjoy the benefits of propane *wherever you live*

1

## PROPANE PRODUCTS PERFORM BETTER

With modern propane appliances, you can relax with on-demand hot water from your tankless water heater, dry laundry faster, secure your home's power supply with a personal generator, heat only the rooms being used with heaters and gas logs, and cook more professionally with a gas range—all saving time and money!

2

## AVAILABLE WHEREVER YOU ARE

Convenient and portable, propane can be used virtually anywhere. From the country to the city, Blossman offers above ground or underground tanks to fit all your landscaping needs (reducing your dependency on the electric grid).

3

## EASY INSTALLATION

All certified Blossman technicians are experts on propane appliances from all major brands. We will prepare your home for service, install appliances, and educate you about your new purchase. Blossman makes propane easy with timeless courtesy and service combined with the best modern technology.

4

## PROPANE PROVIDES CLEAN, VERSATILE ENERGY

Propane is not just for firing up the grill or heating the living room. That's why more than twelve million Americans depend on the reliability of clean-burning propane, and as a consequence of the higher efficiency of propane products, they also enjoy lower emissions and cleaner air.

Made in  
the USA

# A Message from our President Stuart E. Weidie

Several weather forecasts have predicted a colder and wetter fall and winter for the Southeast as 2014 turns into 2015, with a possible El Niño effect increasing unpredictability. Those of us at Blossman feel a sense of pride in knowing that the versatility and reliability of our propane appliances and the quality service we deliver will help to benefit our customers as they ride out the possible extremes of this year's weather in comfort.

Families with propane-burning stoves and gas fires will be able to cook and heat their homes even during extended electrical power outages. Propane-powered backup generators will keep the lights on during the worst conditions. Our Blossman Custom Payment Plan Plus combined with our Never-Out Guarantee will protect families from price spikes and fuel outages when they need it the most.

Modern propane technology does not stop with gas logs and kitchen stoves. This catalog details the multiple other uses for propane in the home, from gas powered dryers and on - demand water heating, to exterior heating and lighting and recreational grilling - these are just some of the many areas propane can enrich your home.

We hope you enjoy this catalog and maybe even get an idea or two that will enhance your home life this winter. Our team at Blossman Gas looks forward to serving you in the coming year, just as we have over the last 60 years.

Sincerely,  
*Stuart E. Weidie*

Stuart E. Weidie,  
President and CEO

# We're Here to Answer, What's Your Question?

For Additional  
information  
Call: 1-888-BLOSSMAN  
Email: [info@blossmangas.com](mailto:info@blossmangas.com)

## Q. What is propane gas?

**A.** Propane (liquefied petroleum gas or LPG) is a nontoxic, colorless, and odorless energy source. We add odor (ethyl mercaptan to produce the rotten egg smell) so it can be easily detected when necessary.

## Q. What is propane used for?

**A.** Propane (clean and versatile enough to be used in residential homes for more than 100 years) is most often used for zone heating, water heating, cooking, and clothes drying--as well as for outdoor grills, lighting, and heating. When electric power goes out, propane can power a standby generator.

## Q. Is propane safe for my family?

**A.** Propane is a safe, clean energy source, providing many benefits that ensure worry-free comfort. It has an enviable safety record due to strict regulations and stringent codes.

As with any energy source, there are steps you should take to further ensure your safety:

- If you detect a gas leak, immediately evacuate everyone from the house and call your local propane provider or the fire department from a safe distance.
- Learn what propane smells like. Propane retailers print scratch-and-sniff pamphlets to help your family recognize its distinct (rotten egg) odor.
- Know where any underground or above ground gas service lines are located, especially when doing yard work.
- Change or clean furnace filters regularly as recommended by the manufacturer.

- Never store cleaning fluids, gasoline, or other flammable liquids near a gas-burning appliance, where vapors could be ignited by the pilot light.

## Q. Is propane safe for the environment?

**A.** Yes, propane is a nontoxic, environmentally responsible fuel that doesn't contaminate aquifers or soil. It is much cleaner than home heating oil, kerosene, and electricity produced by non-renewable sources, and is an approved clean alternative fuel listed in the 1990 Clean Air Act.

## Q. Is propane really convenient to use and store?

**A.** Yes, Blossman Gas offers several propane delivery options with tanks in a variety of sizes. They can be installed upright or horizontally, above or below ground. Propane tanks are environmentally friendly, require little maintenance, and can last up to 40 years. In liquid form, propane is a convenient and portable fuel for grilling, camping, and other uses.

## Q. What assurance do I have that the Blossman technicians are properly trained?

**A.** Blossman Gas provides state-of-the-art training for its employees at Blossman University, a 10,000-square-foot facility in

Ocean Springs, Mississippi—the only one of its kind in the industry. All Blossman technicians are certified through the Certified Employee Training Program (CETP) offered by the Propane Education & Research Council (PERC) and the National Propane Gas Association (NPGA). Blossman updates their training programs frequently to keep our employees up-to-speed on the most current information.

## Q. Can switching to propane really save me money?

**A.** Yes, propane gas can save you money through lowered operating costs (up to 1/3 lower than electricity). Propane zone heaters and gas fireplaces allow homeowners to heat select rooms only, and propane powered appliances (dryers, cooktops, and more) save you time and money because they work more efficiently than electric-powered ones.

## Q. Can Blossman technicians convert natural gas appliances to propane?

**A.** Yes, Blossman technicians are trained to easily convert most natural gas appliances to propane.

## Q. Where do I find out more about propane?

**A.** Blossman's 68 branches across the Southeast bring comfort and security to more than 130,000 families. Find a store near you at [www.blossmangas.com/propane-benefits/contact](http://www.blossmangas.com/propane-benefits/contact).

# Our Service: *Comfort of Knowledge and Training*

“Blossman Gas exists for the benefit of its employees, and the success of the company depends upon our employees rendering a superior service to our customers. In dealing with employees and customers, one must always keep in mind that every individual is a human being and should be treated with compassion.”

—Woodrow Blossman, Founder

Properly trained and educated employees, customers, and end-users mean a healthier organization and a safer industry. Employee training is mandated by DOT, NFPA, and other groups, and it makes good business sense. Blossman Gas reinforces this philosophy at Blossman University, their 10,000-square-foot training facility located in Ocean Springs, Mississippi.

This state-of-the-art facility has two classrooms, ten work stations, and an area dedicated to piping and venting. All technicians and personnel are trained and tested in a 4-day, full-immersion course, to ensure they deliver the “Comfort of Blossman” to every customer. After completing the course our employees are knowledgeable in all areas of Blossman service, from safety

and installation, and appliance specs and customization, to attitude and personality awareness, and customer satisfaction policies.

All Blossman technicians are also certified through the Certified Employee Training Program (CETP) offered by the Propane Education & Research Council (PERC) and the National Propane Gas Association (NPGA). Training programs are frequently updated to ensure that employees have the most current information and utilize the latest procedures for all propane deliveries.

Propane Gas, Appliance & Service

# Blossman Service Pak

*The Blossman Service Pak is an annual maintenance and professional cleaning service for your gas appliances. Just as your automobile benefits from regular service, your gas appliances operate better and longer when professionally maintained. Our Service Pak includes the routine maintenance many appliance manufacturers recommend. Plus, it provides a detailed check of your appliance and your gas system to ensure that both are operating at peak performance.*

## Appliance Service Pak benefits include:

- Complete tune-up and professional cleaning of the gas appliance
- Thorough cleaning and inspection of internal working parts
- Thorough checks for damage or wear to component parts
- Inspection and test of the appliance safety system
- A complete leak test and flow check of your gas system
- Repair recommendations, if necessary
- Automatic annual renewal
- Priority service
- No overtime charges
- 15% savings off future repairs

## Appliance Service Pak

**The Appliance Service Pak includes** all makes and models of gas appliances, including generators, furnaces, water heaters, gas logs, fireplaces, heaters, dryers, kitchen appliances, grills, lights, and propane tanks.

Blossman continues to maintain customer service procedures that always place the customer first. Blossman practices a customer service philosophy born in the 1950s, when first-rate customer care was second nature in America, and was part of what made America different and great.

That was a time when the merchant said, "Thank you! Come again!", the milkman delivered milk, and the gas station attendant washed your windshield- a shared culture of service that Blossman intends to keep alive. It's the Blossman way.

## Each technician is instructed and tested on:

- Standards, safety codes, and regulations that apply to the propane industry
- Service, installation, and maintenance on all gas appliances
- Receipt, storage, and delivery of propane

- Cylinder filling stations, different types of cylinders, their markings and usage
- Piping and tubing materials, fittings, and tools used in the industry
- How to develop and maintain good, professional business relationships
- Gaining insight on residential, commercial, and industrial applications of propane

## Find Lammy

You may have seen "Lammy" in our commercial this year. He also makes an appearance in one of the photographs in this catalog. Gather your children, or find the child in you, and identify "Lammy" hiding in the catalog!

# Financing & Payment

## The Blossman Custom Payment Plan

**Blossman Custom Payment Plan** is the easiest and most economical way to budget your propane energy costs! As a Blossman customer, you will have year-round, easy-to-manage payments, additional earnings on credit balances, and automatic delivery service. If paying year-round isn't for you, a plan can be customized to fit your needs.

## With the Blossman Custom Payment Plan Plus

**Blossman Custom Payment Plan Plus** provides you with all the benefits of the Blossman Custom Payment Plan with the additional security of a year-long price cap. That means you get equal monthly payments, worry-free gas delivery with our Never-Out Guarantee, and you're protected from spikes in energy prices. With the Price Protection offered by the Custom Payment Plan Plus, you'll never pay more than your capped gas price, even if the price of propane goes up. Through the Price Protection offered you still get to take advantage of the lower rates. To secure yearlong Price Protection, call your local Blossman store.

Enrollment period: customers who opt into Price Protection between June 30th and September 31st can secure the June price cap. After September 31st, price caps are established on the date of buy-in and valid through June 30th of the following calendar year.

## Also, Blossman finances appliances!

With competitive rates and flexible terms, our financing program makes it easy for you to afford the comforts of propane appliances. Call or stop by your local Blossman Gas location for more information.

# Our Story

Woodrow Blossman started his business with ten employees on the premise that a company should exceed its customers' expectations and that the employees were its most valued asset. More than 60 years later, Blossman is the eighth-largest propane company in the United States, and employs over 600 people. It has remained a private, family- and employee-owned company, allowing us to maintain the traditions and philosophy Woodrow started. Our continued mission is to provide a level of service dedicated to a positive customer experience of propane use, not just a focus on the bottom line.

At Blossman Gas, "service" is not simply a term used casually - it's a way of life for the families and employees. Blossman would cease to function without "service" being central to

## Our Founder

Born October 10, 1913, Woodrow Blossman worked with his brother, A.R. Blossman, Sr. until 1951, when Woodrow branched out to form Blossman Gas. The company quickly grew into one of the largest propane suppliers in the Southeast.

"My objective was to create the work environment where employees could develop their full potential. I came up with the idea to create a company where everybody could have a sense of security as well as comfort."

the business. Along with market leading customer service, independence is also at the core of Blossman's success — the autonomy and the agility to build a propane-based business, while allocating substantial resources to market innovations, employee education and training, as well as research and development.

Blossman Gas was one of the first propane marketers to embrace the National Propane Gas Association's Gas Appliance System Check (GAS Check™), a voluntary inspection program that provides safety inspection guidelines for technicians. The company continues to lead the industry in safety practices and standards, requiring rigorous training and continued education for all Blossman technicians.

# Our Growth

Through a series of acquisitions in the 1960s and '70s, Blossman

added 19 branch locations throughout Georgia and Alabama.

Over the next 20 years, Blossman Gas continued its expansion,

and now services customers from 68 branches in 12 states, and

sells more than 85 million gallons of propane per year. In addition

to propane gas, Blossman provides service, installation, and sales

of gas-related products, including gas fireplaces and logs, grills,

generators, water heaters, cooktops and ranges, gas dryers, space

heaters, and lawnmower conversions.

True to his word, Woodrow developed a company whose primary focus was more about the business practice than the product. His values have been maintained within the company for over 60 years, despite the world's shift from personal interaction to a "drive through" society. Blossman Gas has clung to the fundamentals of the Golden Age of service, one that Americans can rely upon and of which they can be proud.

# Fireplaces & Gas Logs

The average family spends over half of their waking hours in one room of their home. Save money and energy by using a propane fireplace or propane logs to heat only the space you're in instead of heating the entire house.

# Year Round

## JANUARY

- Consider using sand or sawdust rather than salt to melt ice on driveways and walkways, since salt can damage the shrubbery in your yard.
- To prevent bursting water pipes in cold weather, open both cold and hot water faucets to a trickle to relieve pressure.

## FEBRUARY

- Try to remove all snow from evergreens after storms. The snow and ice can damage the branches.
- Get ahead of spring cleaning by starting with your pantry spaces. Remove old, expired items and donate items you won't use before their expiration date.

## MARCH

- Check gutters for clutter and gunk that can lead to water damage.

## JULY

- For family BBQs and holidays during the summer, grill-out as often as you can. Using your oven forces the AC to work harder.
- A full freezer uses less energy than an empty one. Keep it stocked!

## AUGUST

- Close the refrigerator door on a dollar bill and attempt to pull it out while the door is closed. If the bill slides out easily, it is time to replace the seals.

## SEPTEMBER

- Consider using timers to turn lights on in the morning and off during the day.

# Comfort

## APRIL

- Check all of your light bulbs and replace inefficient ones with newer, more energy-efficient.
- Check windows and doors for air leaks. A properly sealed home can save 20% on energy costs.

## MAY

- Clean all of the windows in your house before the summer months. Try using a vinegar/water mixture and newspaper for a better clean.
- Keep salt in the cracks of your deck or patio to prevent weeds from growing in the spaces.

## JUNE

- During the hot summer months, raise the thermostat before you leave the house in order to save on your electricity bill.
- Letting dishes air dry is an easy way to save energy. Pull them out after the wash cycle.

## OCTOBER

- Save money on your energy bill by using natural light during the day and only having on the lights that you need at night.
- When you store summer clothes for the winter, avoid storing them in plastic bags, as these can sometimes cause yellowing of your clothes.

## NOVEMBER

- Before Thanksgiving, consider giving away some non-perishable items to charity if you know you won't use them.
- To get the most out of your heat supply, avoid blocking any air vents with drapes or furniture.

## DECEMBER

- A good way to restore old finished wood furniture is to steep tea bags in hot water for 10 minutes, and then dampen a clean, soft cloth with the tea and wipe down the furniture.

# Salmon Marinade

- 1 cup vegetable oil
- ½ cup lemon juice
- ¼ teaspoon garlic salt
- ¼ teaspoon salt
- ¼ teaspoon pepper
- 2 teaspoons sea salt
- 4-5 pounds salmon filets, skin on

### Instructions

Put vegetable oil, lemon juice, and seasoning in blender and blend for one minute. Cut salmon filets into 3-inch squares. Place salmon in bowl and completely cover with marinade and allow to sit for one and a half to two hours. Make a pan out of aluminum foil and place it on the grill as it preheats on high for 10 minutes. Place salmon, skin side down, in pan and pour marinade over fish. Cook on high for 10 minutes then reduce heat to low for 30 minutes. Salmon skin will stick to the pan making it easy to slip a spatula between skin and fish when removing from pan.

# Fire Pits, Lights & Outdoor Heaters

Don't let a chilly evening stop you from enjoying the outdoors. With Blossman's propane-powered gas lights and fire pits, your deck or patio area can be as comfortable as your home. They'll keep you warm and toasty—even if the power goes out.
